

DS2

DESKTOP STUDIO ARM

The DS2 is a compact desktop studio arm that's ideal for microphones, cameras, smartphones, lights and other accessories up to 900g. With its heavy base stand, there's no need for clamps or mounting points – simply sit it on your desk or other flat surface. It features two pivot points so you can quickly reposition your equipment, and its integrated cable guide slots will ensure your desktop remains tidy.

- Heavy base for perfect balance on a desk or other flat surface
- Ideal for devices up to 900g
- Two pivot points for ultra-flexible positioning
- Cable management guides to help keep your setup tidy
- Included 3/8" to 1/4" adaptor allows you to mount a range of different screw threads
- Designed and made in RØDE's precision-manufacturing facilities in Sydney, Australia
