SPL Warning:

Exposure to extremely high noise levels may cause permanent hearing loss. Individuals vary considerably in susceptibility to noise-induced hearing loss but nearly everyone will lose some hearing if exposed to sufficiently intense noise for a period of time. The U.S. Government's Occupational Safety and Health Administration (OSHA) has specified the permissible noise level exposures shown in the following chart. According to OSHA, any exposure in excess of these permissible

limits could result in some hearing loss. To ensure against potentially dangerous exposure to high sound-pressure levels, it is recommended that all persons exposed to equipment capable of producing high sound-pressure levels use hearing protectors while the equipment is in operation. Earplugs or protectors in the ear canals or over the ears must be worn when operating the equipment in order to prevent permanent hearing loss if exposure is in excess of the limits set forth here:

根据OSHA的规定，任何超过这些允许限度的暴露都可能导致一些听力损失。为避免接触高声压级的潜在危险，建议能够接触到的所有产生高声压级设备的人员，请使用听力保护器在设备运行时。在操作设备时，必须在耳道内或耳朵上佩戴耳塞或保护器，以防止暴露于超过此处规定的限度，而导致出现永久性听力损伤。

Please use this manual to familiarize yourself with the features, applications, and correct connection procedure for the HP4 before trying to connect it to your recording system. Pay close attention when connecting the HP4 to your system, as bad cables and improper grounding are the most common causes of problems encountered in recording and live P. A. environments. We recommend checking your cables, connections, and grounding if you experience any noise or other sonic performance problems.

在尝试将 HP4 连接到你的录音系统之前，请熟悉本手册HP4的使用功能、应用和正确的连接程序。HP4连接到你的系统时，在将HP4连接到系统上时要关注，因为坏的电缆和不当的接地，是在录音和现场P.A.环境中遇到的常见问题的原因。如果你遇到任何噪音或其他音质问题，我们建议检查你的电缆、连接和接地。

2.0 Quick Start Guide 快速入门指南

This Quick Start guide is designed to help get your HP4 connected to your system as quickly as possible. The following step-by-step instructions are based on a common studio environment. Your actual setup may change based on your needs and applications.

本快速入门指南旨帮助你尽快将HP4连接到你的系统。下面的步骤说明是基于一个普通的演播室环境。你的实际设置可能会根据你的需要和应用而改变。

2.1 Getting Started

Connect the Power

连接电源

1. Turn every knob on the front panel of the HP4 completely counterclockwise (left).. 将HP4前面板上的每个旋钮完全逆时针旋转（左）。
2. Connect the included power supply to the HP4 and plug it in to a wall socket, power strip, or surge protector.

将附带的电源连接到HP4，并将其插入墙上的插座、电源线或电涌保护器。

Connect Your Input Sources

连接你的输入源

1. Turn down the main output volume on your audio interface or mixer to its lowest position. 把音频接口或调音台的主输出音量调到最低位置。
2. Connect the main outputs of your audio interface or mixer to the Left and Right TRS inputs on the back of your HP4. For the best

sound quality, PreSonus recommends using balanced cables whenever possible.

将音频接口或调音台的主输出连接到HP4背面的左右TRS输入。为了获得最佳音质，PreSonus建议尽可能使用平衡电缆。

3. Connect the Left and Right Monitor/Thru outputs on the back of your HP4 to the inputs of your powered studio monitors or power amp (if your studio monitors are passive). This will allow you to use a single output pair from your audio interface or mixer to feed both your HP4 and your studio monitors. 将HP4背面的左右监听/直通输出连接到带电源的工作室监听或功率放大器（如果你的工作室监听是无源的）的输入。这将允许你使用音频接口或调音台的单一输出组，为你的HP4和你的演播室监听提供信号。

Set Monitor Levels

1. Connect a pair of headphones to the Phones 1 output.
将一副耳机连接到耳机1的输出。
2. Play a CD, DAW session, or other audio recording that is typical of your studio productions through your audio interface or mixer outputs.
通过音频接口或调音台的输出，播放CD、DAW会话或其他典型的工作室制作的音频记录。
3. Turn the main output volume of your audio interface or mixer to unity gain. You may need to consult the documentation that came with your device to determine the knob or fader position for unity gain.
将你的音频接口或混音器的主输出音量调到统一增益。你可能需要查看你的设备附带的文件，以确定统一增益的旋钮或音量控制器位置。
4. Begin turning up the Phones 1 volume knob on the front panel of your HP4 until your headphones are at a comfortable listening level.
开始调高HP4前面板上的电话1的音量旋钮，直到你的耳机处于一个舒适的聆听水平。
5. Begin turning up the Monitor Level knob on the front panel of your HP4 until your studio monitors are at a comfortable mixing level.
开始调高HP4前面板上的监听电平旋钮，直到你的录音室监听处于一个舒适的混音水平。

3.1 Front-Panel Layout 前面板布局图

Headphone Volume. The HP4 has the potential to be very loud. (It goes to 12; 11 is for wimps!) Please be careful when you first start passing sound through the unit. It is best to start with the volume set at 1 and then slowly bring up the volume.

Headphone Volume. HP4有可能变得非常响亮。(它可以达到12; 11是给胆小鬼的!)当你第一次开始通过该装置传递声音时, 请注意。最好从音量设置为1开始, 然后慢慢调高音量。

Note that the loudness of your headphones will vary depending on their design and their input impedance. The output impedance of the HP4 is 51Ω (ohms), and it will work fine with professional and consumer headphones but the volume will differ depending on which type of headphone you use. Headphones with lower input impedances will generally be louder than higher-impedance headphones. (In this case, louder does not mean better!) Most professional headphones have impedances between 150Ω and 600Ω. Consumer headphones for CD players and the like often have impedances between 8Ω and 32Ω. Broadcast headphones are specialized, and you are unlikely to use them with an HP4; their impedances are typically between 1.5 kΩ (kilohms) and 2 kΩ.

请注意，你的耳机的响度会因其设计和输入阻抗的不同而不同。HP4的输出阻抗是 51Ω （欧姆），它与专业和消费类耳机都能正常工作，但音量会因你使用哪种类型的耳机而不同。输入阻抗较低的耳机一般会比阻抗较高的耳机声音大。（在这种情况下，更大的声音并不意味着更好！）大多数专业耳机的阻抗在 150Ω 和 600Ω 之间。用于CD机和类似设备的消费者耳机通常有 8Ω 至 32Ω 的阻抗。阻抗在 8Ω 和 32Ω 之间。广播用耳机是专门的，你不太可能用HP4来使用它们。

Mono button. When you press the Mono button, each input will be summed together on each output. For example, if you plug a CD player into the left input, and press the Mono button, the signal from the left input will be present in the left and right headphone channels and in the master output. When the Mono button is not depressed, the left and right outputs will carry the left- and right-channel signals, respectively.

Mono button. 当你按下单声道按钮时，每个输入都会在每个输出上被加起来。例如，如果你把CD机插在左边的输入上，然后按下单声道按钮，左边输入的信号将出现在左边和右边的耳机通道和主输出中。当 **Mono** 按钮没有被按下时，左和右输出将分别携带左和右声道的信号。

Monitor Level. The Monitor Level knob controls the volume of the rear-panel

Monitor Level. 这个旋钮控制后面板输出的音量。

Monitor Mute. The Monitor Mute button mutes the main rear-panel outputs, which is handy when you only want to use the front-panel headphone outputs. This is especially helpful when recording in front of a computer and studio monitors: you can simply mute the

signal going to the monitors rather than turn down the Monitor Level.

Monitor Mute. 此按钮可使后面板的主输出静音，当你只想使用前面板的耳机输出时，这很方便。当在电脑和录音室监视器前录音时，这一点特别有帮助：你可以简单地将进入监视器的信号静音，而不是调低监视器电平。

3.2 Back-Panel Layout 后面板布局

Left/Right Balanced Inputs. These line-level inputs should only be used for signals from sources that do not require preamplification, such as CD and MP3 players, mixers, and audio interfaces.

Left/Right Balanced Inputs. 这些线级输入只能用于不需要前置放大的信号源，如CD和MP3播放器、混音器和音频接口。

Left/Right Balanced Outputs (Monitor/Thru). These are the line-level outputs for the HP4. The Monitor Level knob on the front of the unit controls their output level. These outputs can be used as a Monitor Thru or to connect another HP4 for additional headphone distribution. (See Section 2.1 for hookup diagrams.)

Left/Right Balanced Outputs (Monitor/Thru). 这些是 HP4 的线路级输出。设备前面的 Monitor Level knob 控制其输出电平。这些输出可以作为监听直通车使用。或连接另一台HP4以实现额外的耳机分配。(参见第2.1节的连接图)。
